The sophisticated system for all eventualities.

Install, connect, finished

FUHR multitronic 881 is always the first choice for sophisticated applications. Its intelligent technology and modular system are versatile and suitable for all applications and door materials (aluminium, timber, composite and PVCu).

The standard model comes in a complete kit including all system components, all ready to connect and all integrable into the door. In this way the manufacturer can supply a door where the functions have already been fully tested. Install, connect, and you're finished!

- ✓ Complete kit designed specifically for your door profile system
- ✓ Plug & Play
- ✓ All components integrated into door
- ✓ Function checked

The complete kit is as easy to order as it is to install. All components can be pre-installed at the door factory, ready to connect. When the door arrives on site it merely has to be connected to a 230 V power supply by a qualified electrician. The kit includes 3 radio keys, one of which is a master key.
